

UCL-MC Portable Digital Microwave Link, 1.7-3.5 GHz

The UCL-MC is a fully integrated MPEG2/COFDM microwave transmitter/receiver system that offers exceptionally robust transmission in high multipath environments. Equally suitable for Electronic News Gathering and Outside Broadcast applications, the UCL-MC can be supplied in either 1 box' integrated transmitter / integrated receiver or '2 box' separate head unit/control unit configurations.

- Analogue (PAL/NTSC) and SDI video with MPEG2 encoding (4:2:2 or 4:2:0)
- Analogue or AES/EBU audio
- RS232 data channel
- Selectable 'Low Latency' modes
- 70MHz IF interfaces (transmitter and receiver)
- Power options to 10 Watts
- Convenient 110/220VAC and 12/24VDC operation
- Comprehensive choice of antennas.
- Optional ASI re-multiplexing
- Optional scrambling
